

# MDU Automatic Undercutter

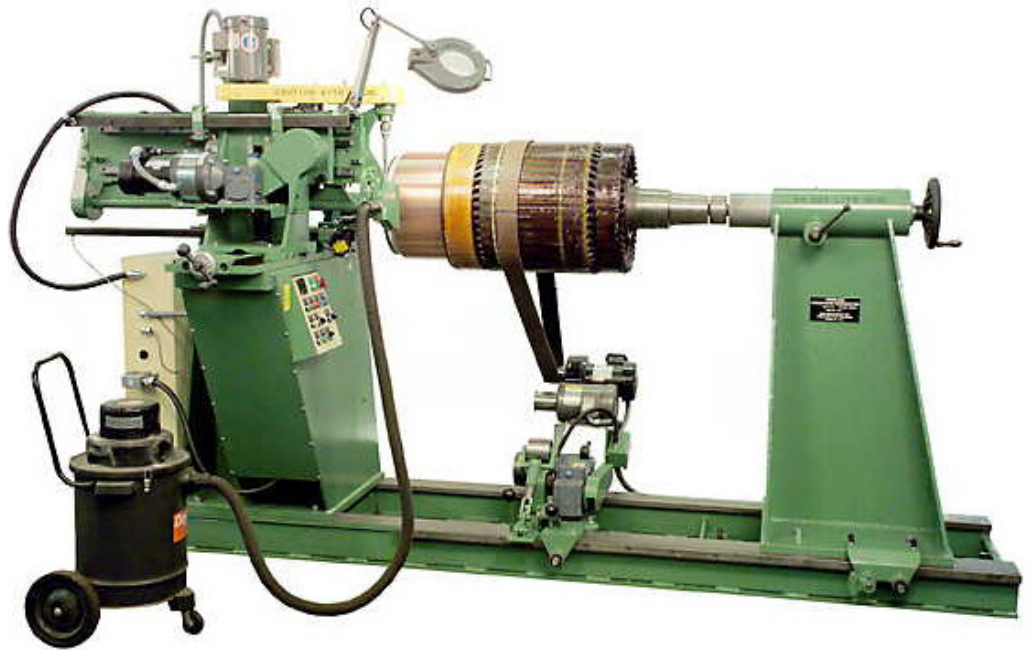

## Smart, Automatic Technology, Consistent Results!

Our MDU Automatic Undercutter is specifically designed to undercut and polish large armatures faster and easier. This highly dependable undercutter and deburring system provides consistent, high quality results while reducing process time from hours to minutes.

The built-in Brush Deburring and polishing system eliminates hand chamfering and simplifies cleaning of the copper bar.

Best of all, the MDU performs so consistently and reliably your machine operator can accomplish other tasks while the machine is undercutting.

### The World's Fastest Automatic Mica Undercutter!

#### Faster Set-up!

- Armatures held between centers
- LED sensor makes saw alignment easy
- Program stores set-up data for up to 200 armature profiles

Fiber optic sensor automatically identifies the mica slot to align the saw.

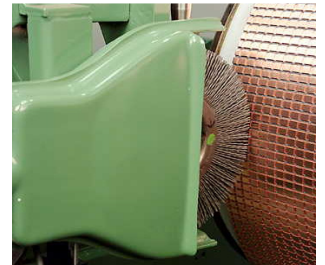

Easy to read mica sensor display makes set-up easy and fast.

Floating spindle follows most skewed mica slots and eliminates constant operator adjustments.

#### Featuring CAM's exclusive, timesaving Brush Deburring System

Removes the sharp edges on undercut copper bars while creating a smooth radius on the corner of the bar. Works in minutes. Eliminates hours of hand scraping.

#### ↓ Bars After Undercutting

After Brush Deburring 5 Minutes ↑
