

Automatic TIG Welding Machines

Faster, More Accurate Welding, Automatically!

CWM Horizontal TIG Welder

- Quick set-up centers require no special tools
- Saw option for cutting off coil ends
- Automatic indexing & weld cycle control
- Programmable to reduce heat build-up
- Easily adaptable for armature diameters/lengths
- Machines sized for armatures up to 25,000 lbs.

Automatic torch movement and position control

Optical sensor detects mica, controls current levels and counts bars

Optional coil end cut-off saw saves time by reducing armature handling.

Automatic TIG welding is a controlled, repeatable process that provides consistent, high quality TIG welds. It simplifies welding, boosts productivity and provides you with the ability to have your operator perform other tasks while monitoring the welding process. Armatures that required hours to weld manually can be expertly, easily and quickly processed with CAM's Automatic Welding Systems. CAM offers three sizes of Horizontal welding machines and a versatile Vertical System.

TOTAL PROCESS CONTROL!

VWT Vertical TIG Welder

- Very affordable Automatic Machine
- Smaller machine footprint
- Operator-friendly controls
- Vertical weld flow for excellent puddling
- Fast set-up on armature sleeves
